Dear Friends,

We again here at Winegardner Show Cattle would like to thank you for your interest in the 2010 Harvest Of Excellence 14th edition. Over the years we have built a reputable program that you can trust and rely on. We feel this year is no different.

We feel we have put together an outstanding set of females with a diverse set of genetics for you this year. These are cattle that are ready to hit the show ring but most importantly will go on to make wonderful cows in the near future. We believe this set of females will not only be ready to compete at jackpots, but most importantly go on to be contenders at next years junior nationals, state fairs, and national shows.

As always there are many people for us to thank. It definitely is a team effort here at our program. I know there are a lot of people I am going to leave out but I most importantly want to thank Jerry Adamson and Dan Sullivan. They both have played an extremely large part in this years sale and we believe we have selected some very unique animals from both programs. We are also very pleased to have many of the same programs backing us. With all of these cattle combined in one sale this is certainly a set you will not want to miss.

It is hard to put into words and pictures just how good this set of females are. You truly need to come see for yourself this years offering. You can come to the farm anytime or stop by the Allen county fairgrounds the week before the sale. As always we are here for your assistance, feel free to give Brad or Tyler or any of the sale consultants a call. We are happy to answer any questions or to help you in your selection process. After all your success is our main goal.

We will be serving a complimentary lunch at 11:00 am for all in attendance. We look forward to seeing you November 6th, and thanks again for your support of our program.

Sincerely,

The Winegardner's

Brad, Melanie, Ashlie and Hannah

Tyler and Natalie

*Delyla*

Chi/MaineTainer • Calved 04.03.10

**Monopoly X Kadabra x Glitter**

Every year it takes a truly special individual to be our Lot 1. Delyla has been unique from the very beginning. She has always been so fun to look at with her added power, eye appeal and structural correctness. Her personality is unexplainable as well. She is extremely gentle, but she is good and she knows it. What an opportunity here to buy a double registered one with this much quality.

*107 Kate - one of the most powerful Charolais females in the breed.*

*Katy*

PB Charolais • Calved 04.11.10

Katy is one that will not only compete hard at the national events but she is one that will run every weekend as well. To us the coolest thing with her is when she becomes a cow and what you can mate her to. Tremendous opportunities here.

Stella

Registered as Chi • Calved 04.07.10

Who Da Man X Heatseeker x 6651

Not only is this female a full sister in blood to countless high sellers and the supreme champion at the NAILE in 2009, but she too is very unique on her own. This is an extremely feminine, beautiful profiling female that is ultra cool to look at. Her added balance and structural correctness allow this female to become a big time show heifer or future donor. The genetics don't lie here.

This young female is definitely royally bred. Being a Who Da Man out of the recent high selling 138M that has had quite the track record herself. Her full sister was shown by us and was crowned the Reserve National Champion (pictured on page 4) and high seller at Bainridge's sale. With all of this being said she is still very impressive as an individual, with extra balance, and soundness. She too is probably the cockiest coolest necked one I've seen.

Another excellent pair of full sisters. These genetics have been proven over the years and continue to get stronger. The balance, soundness and longevity of these two will be extremely profitable down the road. If there is any doubt what these two will look like a year from now, come look at there full sister, she will be a major contender in Louisville this fall.

**7b** *Lizzy*  
 Registered Chi • Calved 05.03.10
