sale order & supplemental information ~

Sale order is catalog order! Any additional information or corrections to the sale catalog will be available online at www.wagyu365.com prior to the sale.

WATCH LIVE & BID ~

The entire auction will be showcased via video/ pictures and broadcast live through LiveAuctions.tv. If you have questions regarding bidding or logging on, please contact Chad Gordon, 580.678.1918 or chadgordon8g@gmail.com.

general sale terms ~

TERMS AND CONDITIONS ... Cattle will sell under the standard terms and conditions. All consignors in the Signature Series 3.0 Wagyu Sale sell their lots 100% fully guaranteed. Any announcements from the sale podium will take precedence over the printed sale catalog.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

DESCRIPTIONS AND FOOTNOTES ... Each consignor wrote the descriptions that pertained to their lot or lots. Wagyu365 does not take any responsibility, in regards, to the guarantee of what was written. Any adjustments or corrections will be made at the time of the sale.

REGISTRATIONS, TRANSFERS AND EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association. The fee is paid for by the seller. It is up to each buyer to research or ask questions direct to the sellers on any specific export information needed for their desired destination.

PAYMENT ... All lots must be paid for immediately within seven days following the conclusion of the Signature Series 3.0 Wagyu Sale unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and sellers will work together to make this the easiest and most efficient process possible.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

HEALTH PAPERS ... All live cattle sold will be accompanied with an appropriate health paper for immediate shipment. Additional health testing may be required from some locations.

GENETIC CONDITIONS ... Log onto www.wagyu.org, go to the animal search and results of the genetic testing will be found on the lot selling. It is the buyer's responsibility to check any information on the lots selling listed on the Wagyu digital beef website before purchasing.

Auction money and proceeds will be conducted under Randall O. Ratliff dba R & R Marketing, P.O. Box 60097, Nashville, TN 37206. Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers and Stockyards Program).

 5:30 p.m. - 7:00 p.m. AWA Gala Dinner
 7:00 p.m. - 11:00 p.m. Music, Casino Night, and Cash Bar *Lucas Jagneaux & the Roadshow and Bryan Martin*

AWA CONFERENCE SCHEDULE

MEET THE WAGYU 365 TEAM

Dear Wagyu Enthusiasts,

It is with great pride and pleasure that Wagyu365 welcomes you to the Signature Series 3.0 Wagyu Sale. The team members of Wagyu365 have worked closely with the AWA Members in solidifying their entries for this annual sale. We couldn't be more pleased with the amount of interest in the promotion and the betterment of the Wagyu breed. It is evident by the positive response from so many fellow breeders, as to the strong desire to make the AWA the best it can be and keep the Wagyu breed at the highest level. My hat's off to the hard work of the AWA staff and Board of Directors, AWA Executive, Robert Williams along with Martha Patterson of the AWA staff and many others for their time and devotion to the betterment of the AWA. They and so many others have spent countless hours of their time in making this AWA Convention the best it can be for all. As you review the sale catalog, you will find some of the finest registered Wagyu cattle in the breed. These breeders have worked hard to showcase their genetics to the highest level to highlight in this sale. The consignors have outlined their thoughts on each of their lots and we look forward to showcasing them in the sale. Make plans to join us for this special sale event on the evening of September 24th at 7 p.m. M.S.T. Immediately following the genetic sale, we will have the AWA donation auction. If you have any questions in regard to the sale, please feel free to contact me or any of my team members at Wagyu365.

Best Regards,

Randall O. Ratliff

This heifer is sired by a Shigesigetani son MFC Shigesigetani 2-12. Shigesigetani is known as a premier carcass traits sire and is backed by TF 151 and CF502 to create this solid top side of the pedigree. Her maternal grandsire is the popular Genesis bull, a son of Itomoritaka who is known for his fantastic female offspring. The pedigree traces back to the well known Lake Wagyu program out of Australia with TF 148 and JVP Fukukane 402E. This is the solid foundation this heifer is built on, take her hope to breed from!

CONSIGNED BY JDH WAGYU, VILLISCA, IA

This Mayura L10 heifer is out of a Celina Cattle Company donor dam from the world renowned Hikokura maternal line. As stated many times before L10 is a top 1% GEBV sire with impressive all-round EBVs. He joins well here with a dam sired by CC YOMIURI 2726, a Hirashigetayasu son with Sanjiro and Itohana 2 behind that. The Hikokura maternal line has shined in Australia having produced elite proven sires, Mayura Itoshigenami JNR, Coates Itoshigenami G113, Sumo Cattle Co Michifuku F154 and many more! This is a fantastic pairing of a great maternal on a top GEBV sire!

Halter broke and broke to lead.

RAB H42 is a product of Rikitani bloodlines on the sire side and Lone Mountain's elite breeding on the dam side. Her sire is a TF 148 x 003 x Haruki 2 x Rikitani. This is a great carcass traits focused pedigree with the bottom side featuring a sire stack of Shigeshigetani x Haruki 2 x Michifuku x JVP 400 x Yuriko! The Yuriko maternal line is one of the leading cow families in the breed having produced elite proven sires such as Bar R Shigeshigetani 30T. This is as solid a pedigree as you will find, and is one to take home and build from!

CONSIGNEE BY WAGYU FARMS, CENTER, TX

Buck Mountain Ranch has pulled out all the stops on this heifer. She is ready to breed. Her dam 407 was our largest Wagyu cow on our farm topping the scales at 1550#. She is gone now and her genetics are limited. Just look at her breeding- Kimifuku 3 – Michifuku – Itoshige Fuji – Kitaguni Jr. She will be a donor cow that can help any operation.

LMR Ms Mayura 0386H ranks in the Top 4% for EMA EBV (+5.0) and in the Top 5% for Marble Score EBV (1.8). In addition, 0386H ranks in the Top 6-7% for all four Australian Wagyu Breed Indexes: Wagyu Breeder (+213); Self Replacing (+228); Fullblood Terminal (+190); and F1 Terminal Index (+181).

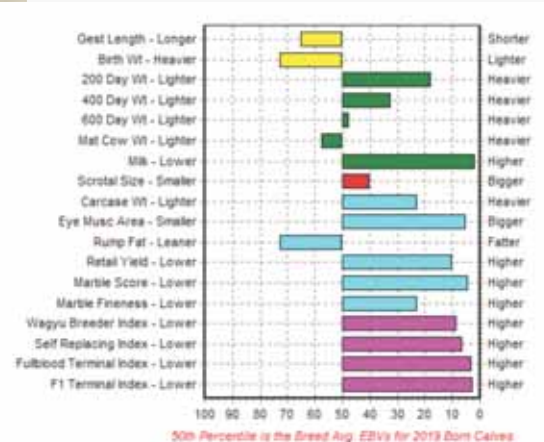

0386H's dam, LMR Ms Itoshigenami 6535D, is another of LMR's donor cows, having produced 49 viable embryos and four calves so far in her young life.

0386H's maternal great-dam is LMR Ms Itomichi-4632 803T, one of Lone Mountain's finest donors. She has produced 24 calves, including a WKS Shigeshigetai steer graded 40% IMF; Itoshigenami TF148 steers graded 41%, 39%, 37% and 36% IMF; and a LMR Yoshihiro 4335B steer that was graded VAB by the USDA Grading Inspector. 803T has produced 34 viable embryos – and produced our outstanding ETJ003 herd sire, LMR Harukiro 5340C, who ranks #6 of all LMR sires in our most recent Sire Summary averaging 35.08% IMF based on 19 carcasses.

This is a polled heifer and daughter of BARV TAZSURU 753E ET, a Bar R 52Y son of the legendary Bar R 5U cow. This breeding has been established as one of the best polled lines in the Wagyu breed. The bottom side of her pedigree features the proven high growth performer LMR Toshiro 1/3. He the son of TF Kikuhana and World K's Reiko, creating a highly popular growth and maternal traits specialist. Further behind this are the solid genetics of TF 150, Itohana 2, and Itomichi 1/2. Here is an ideal growth and maternal traits backed polled heifer to create a herd around.

CONSIGNED BY 5 OAKS FARM, GRISWOLD, IA

B3F, CHSF, CL16F, F11F, F13F

Here is a beautiful pedigreed Mayura L10 daughter! She boasts an impressive sire stack of Mayura L10 x 001 x Sanjirou x Kitaguni Jr x Chisahimes. L10 needs no introduction with his elite GEBVs of +2.6 MS, +7.7 REA, and +43 CW. He is an ideal pairing here with a high growth and maternal traits Hirashigetayasu 001 daughter. This maternal line has produced elite proven sires in the USA and Australia so breed with confidence here. Her sire, L10 brings the carcass traits of Mayura Itoshigenami JNR to this already elite pedigreed donor and so creates a donor dam quality female you can take home and build a program around. Halter broke.

Both females pasture exposed to several bulls, information will be available on sale day.

Wagyu breeders take a close look at the pedigree of this animal! The 1st genetic recessive disorder free born female by JVP Yasutanisakura 931 in the US and one of only four known to be in existence perhaps in the world!

We've all read about national certified Wagyu semen salesman in Japan, Taiki Otsuka, "The Yasutani Doi line of Tajima is considered THE hands down highest quality marbling and best tasting fat of ALL TAJIMA LINES in Japan, and is the most highly sought after luxury line for no expense spared marbling and fat quality, even more than the Nami line." If one looks closely you will notice that 931 has Dai 7 Itozakura as his maternal grandsire. In Japan, Dai 7 is widely considered the greatest Shimane sire of all time. Although there may be some debate about Dai 7 Itozakura's ancestral categorization being that his sire, Dai 14 Shigeru, was born in Okayama yet his maternal line originated from Shimane. Dai 7 is regarded by Professor Kenichi Ono, author of The Outstanding Wagyu of Japan, first volume, as a "fabulous" bull and the smartest economic investment among all Wagyu strains. He is famous and popularly used throughout Japan and is known as the 'best of the best' bulls. This bulls strongest points are his good daily weight gain, peaceful disposition and gentle nature, and early maturation. Dai 7 Itozakura sired and grand sired many famous Wagyu, including Itomichi J11158, Kitaguni 7 no. 8, and Itozurudo TF 151. Dai 7 Itozakura was so famous in Japan that his picture was on a phone card, undoubtedly the most well known bull of the Fujiyoshi line. According to Professor Ono, his progeny's marbling score was unheard of at the time - a full three times higher than most of the bulls of his era. I have In the 2019 TX Wagyu Assoc. feedlot test, the highest marbling score of that test's recorded history went to a bull sired by a son of Yasutanisakura! The largest herd of full blood Wagyu cows in North America owned by Ultimate Kobe Beef uses herd bulls almost exclusively out of Yasutanisakura sired cows. They have been making F1's and full bloods for feedlots for 2+ decades.

As if having a female genetic recessive disorder free female by Yasutanisakura were not enough, the dam of this female was sired by a bull named TF Takefuku 823 (fb 10573). Haven't heard of him? Not a wonder. Since 2014 there have been a total of 18 registered progeny with 8 of those 18 being registered in 2021 alone. Of those 10 animals that are registered prior to 2021 (with the first registration occurring in 2014), only 4 were females! SHR Ms Takefuku (fb 24092) was the FIRST female born in the US from this bull. The pedigree of TF Takefuku 823 is simply incredible. A bull sired by Kimifuku 3 (purported to be Takeda's highest marbling bull raised in his lifetime) out of a cow (tf 760) that was sired by TF Kikutsurudo 146! Both of these bulls, Kimifuku 3 and Kikutsurudo, were sons of the great Japanese bull Tanifuku Doi (fb 621). Tanifuku Doi, a top Tajima sire in Japan, was sired by Yasutani Doi (fb 212) out of Japan's most famous cow, Kikutsuru (fb 308), well known in Japan and the world as "The Hyogo Cow". Kikutsuru is considered the most important cow in the Tajiri line. Yasutani Doi is also the sire of the legendary Yasufuku J930 (whom is listed by Kenichi Ono as the #1 bull of his top 15 most outstanding Wagyu of Japan) as well as Tanishige (fb 211), the sire of Suzutani, who herself is the dam of Sanjiro and Shigesigetani. TF Takefuku 823, now deceased, was a CL 16 carrier. Luckily, SHR Ms Takefuku tested free of CL 16!

To add even more value of this female, the maternal grand dam of the female up for auction is named Perfect (fb 12466) whom was the Grand Champion Cow/Calf of both the National Western Stockshow in Denver AND the Houston Live-stock & Rodeo Show in 2013.

Perfect's dam is a famous cow named SHR 2427. SHR 2427 is an out cross to most all genetics existing in the Wagyu breed as well as an outstanding and very rare breeding of some of the Wagyu industry's most influential cattle. SHR 2427 is considered a group 'C' (associated with frame size and growth) dam in the four stage Takeda full blood breeding rotational plan. SHR 2427's Japanese 16/16 analysis is as follows: 50% Tajima, 12% Kedaka, 31% Itozakura, and 6% Shimane. SHR 2427's inbreeding coefficient is an amazing 0%. SHR 2427 is a mating between CF 503 (a cow bred and owned by the premiere Japanese breeder Mr. Shogo Takeda) and Takeda's extraordinary bull, Itozurudo 151. In Mr. Takeda's words, "Hikokura 1/7 was bred to Itomichi, a famous son of Dai 7 Itozakura. The female offspring, Hikokura 1/10, is a super sized good marbling cow. I bred her to Itoshigenami (resulting in CF 503) then 'back crossed' using Itozurudo TF 151. This will produce a large animal (SHR 2427) with good marbling, milk production, and calf raising potential." Itoshigenami TF 148 (another of Mr. Shogo Takeda's influential sires) sired CF 503 and was himself sired by Shigesigenami J10632. Shigesigenami J10632 is regarded by Professor Kenichi Ono as the #4 bull in his first volume book "The Outstanding Wagyu of Japan" and the bull most representative of "meat quality Wagyu". The major assets of the Shigesigenami line include a high degree of marbling and a high probability of those good characteristics being passed down to his progeny. In addition, Itoshigenami TF 148 was claimed by David Blackmore to be one of the top three bulls to ever leave Japan. Shigesigenami J10632 traces back twice to his sire, Shigekananami, the sire who made the Kumanami line of Tajima famous. This family has extremely potent marbling genes. This classic Takeda ("Modoshi Kohai") breeding produced SHR 2427 - a Yasumi Doi - Dai 7 Itozakura - Shigesigenami composite. This is an absolutely sensational mating and there are few animals remaining alive like it.

Finally, longevity is an important economic and heritable trait that while currently is not measured and given a separate epd, it is something that breeders should be well aware of. Thankfully and gratefully, the THREE generations of animals that eventually made the female up for auction today are alive and still producing on the ranch. They are: SHR Ms Takefuku 7 years 3 months, Perfect 11 years 5 months, SHR 2427 13 years 7 months. As an additional note the bull SHR 2410 (which is also in the pedigree) is also alive and in the same town. He is 14 years and 3 months of age.

Wow, a direct son of Sanjiro 3!! Sanjiro3 is the leading Marbling sire on the WSU Sire Summary. He is a Michifuku son of Suzutani and known for extreme marbling and ribeye ability. You can no longer find his semen so these are rare genetics. The maternal side of this pedigree displays incredible maternal and growth traits ability with Itomoritaka and Hirashigetayasu. The sire stack of this bull is Sanjiro 3 x 002 x 001 x Kikuhana x Hikohime 3/2! Hikohime 3/2 is a legend in the Wagyu breed and matriarch of the best cow families in the USA and Australia!

The only known live registered male genetic recessive disorder free progeny of JVP Yasutanisakura J931 currently in existence possibly in the world! The only previous genetic recessive disorder free male progeny of Yasutanisakura was a bull named JC Yasutani 068 Tex 8126 (otherwise known as "Sensei") owned by George and Amy Greer of Winters Family Beef. Sadly, Sensei has passed away. The first ever offering of Sensei's semen at the Steaks Are High 2017 sale in Texas drew a whopping \$400 per straw! Wagyu breeders in search of diversity in the form of a male offspring who are concerned about the recessive disorders need not be with this bull. What's even more remarkable is that the bull up for auction has JVP Fukutsuru 068 (a known F11 carrier) TWICE in the dam's pedigree yet this female (2+K Kibou) was free of F11 as well. The dam (2+K Kibou) of the bull on offering here was purchased from long time well regarded Wagyu breeder Tom Seitz of Savory Creek Cattle in Wyoming. If you're after extreme marbling this is the bull to consider. This bull traces back three times in it's lineage to Yasutanido!

CONSIGNED BY SPRING HILL RANCH, PETALUMA, CA

Tenderness: 4

SP E2F ET is a three-year old bull that is immediately available to use in your breeding program. He is double bred by Yasufuku Jr. Yasufuku Jr. has a well-proven history of not only excellent marbling but excellent USDA Grade, and marbling fineness, as well as ribeye area. In Bob Estrin's most recent sire performance summary report, Yasufuku Jr. ranks with 62 progeny analyzed as #10 in IMF (33.26%), #12 in fineness, #8 in USDA grade, and #16 for REA (ribeye area).

E2 has not been tested for CL16 (is free of all other genetic conditions).

Low risk and high-performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment. Mayura L0010 is an Australian Record Priced Wagyu bull, an international sensation. His semen sold for over \$1,800 per unit in an Australian auction. Mayura ranks in the top 1% for eye muscle area, marble score and marble EBV's. Son of L0010 was sold at auction for AU \$105,000. Mayura L0010's sire, Itoshigenami (King of Australian Wagyu sires), is the leading sire in Mayura's grain - feeding program, consistently producing the most outstanding carcasses in every assessment. He follows in his sire's footsteps as he has been regarded as one of the best bulls in the entire history of the Wagyu breed. We consider L0010 as the whole package having marbling and growth, but most of all, being backed by Mayura's carcass data. Mayura L0010 ranks in the top 1% for eye muscle area, marble score and marble EBV's.

Kikokage 29A is a super mix of bloodlines: 32% Tajima, 26% Kedaka, 35% She-mane, 9% Okahama. She is very closely related to the original Japanese genetics. Her 6th dam, Yuriko-1 is one of the very few cows which exported from Japan to the USA.

These embryos are a high reliability investment in fantastic genetics.

Would you crave the potential to produce calves with a Self-Replacing Index (SRI), Wagyu Breeder Index (WBI) and Fullblood Terminal Index (FTI), Eye Muscle Area (EMA) ALL in the top 1% of the breed? How about on the same calf with a marbling score in the top 2% of the breed? The results of this mating speak for themselves! A few calves from this mating have been born at Prime Valley Farms. Below is an example of actual GEBV on a live calf born out of this embryo mating here for sale.

Mayura L0010 ("L10") is the highest ranked son of Itoshigenami Jnr because of his balanced EBVS. He brings it all in one package, ranking in the top percentile for relevant traits. According to Breedplan, he ranks in the Top 1% for Marble Score EBV, Ribeye Area EBV and in the Top 1% for all 4 Wagyu Indexes: Wagyu Breeder Index, Self-Replacing Index, Fullblood Terminal Index and F1 Terminal Index. L10 was purchased in 2017 by Hewitt Pastoral (Australia) for AUS\$105,000. Recently, a son of L10 sold in Texas for \$150,000! The small quantity of L10 semen sells for over \$1,000 per straw.

Prime Valley Farms has mated the elite Mayura L10 sire to their very own PV11C. PV11C is one of the largest-framed cows in the herd, weighing in at 1,500 pounds; yet she is efficiently built! She has proven excellent at milk, maternal abilities and fertility. Her huge spring of rib and easy keeping make her a herd standout.

Both sire and dam are registered with the American Wagyu Association as well as the Australian Wagyu Association. This is a spectacular mating with proven results!

Embryos are stored at Remuda Veterinary Center, 815S 400E, Lagrange, IN 46761, 260.463.2005.

The genetics featured in the pedigree of this donor dam combine the bloodlines of breed greats Okutani, Yuriko, and Chisahime. The sire of the donor dam has Fujiko/Okutani on both sides of his pedigree. The maternal side of the donor's pedigree shows 170P and then reliable foundation sires Michifuku and Kikuhana. Michifuku brings elite carcass traits and Kikuhana brings growth and maternal traits to the pedigree. Behind all of this is Kikuchisa 19E and her illustrious dam, Chisahime.

CONSIGNED BY JDH WAGYU, VILLISCA, IA

SIRE, **MAYURA L0010 ET**

Embryos are stored at Premier Reproduction Services, 6601 Grandbury Hwy, Weatherford, TX 76087, 817.599.7721.

Low risk and high-performance probability are the two main keys to breeding success and profitability. These embryos are that kind of investment. Mayura L0010 is an Australian Record Priced Wagyu bull, an international sensation. His semen sold for over \$1800 per unit in an Australian auction. Mayura ranks in the top 1% for eye muscle area, marble score and marble EBV's. Son of L0010 was sold at auction for AU \$105,000. Mayura L0010's sire, Itoshigenami (King of Australian Wagyu sires), is the leading sire in Mayura's grain -feeding program, consistently producing the most outstanding carcasses in every assessment. He follows in his sire's footsteps as he has been regarded as one of the best bulls in the entire history of the Wagyu breed. We consider L0010 as the whole package having marbling and growth, but most of all, being backed by Mayura's carcass data. Mayura L0010 ranks in the top 1% for eye muscle area, marble score and marble EBV's.

Marie, 34W, is a full sister to Maverick (FB15730), a bull who is making great carcasses. She is also a full sister to Elizabeth, FB13775, who's embryos sold for over \$10,000 per embryo at the 2019 Australian Elite Sale.

These embryos are a high reliability investment in fantastic genetics.

These embryos come from the absolute heart of the Takeda Farms herd and would be hard to find anything like this in the US! The sire of the embryos is L10 is a grandson of the Takeda sire, TF 148, from the Takeda Aizakura maternal line. The dam of the embryos is the daughter of an Itohana 2 son from the Takeda Chiyotake line, and her own direct maternal line is the famous Hikokuras, which are the crown jewel of Takeda genetics. You don't have to go far in this pedigree to find the foundation sires of Takeda Farms, including Itohana 2 and Itomichi. This is truly a unique genetic opportunity in the US.

There is great carcass potential with this embryo offering. With L10 as the sire, half of the genetic equation is in place. The maternal side of the equation is equally potent in carcass traits with the sire of the donor dam being the highly proven Suzutani son, Shigeshigetani. The sire and dam of these embryos set up superior, money-making, carcass trait parent averages for Eye Muscle Area and Marbling. The dam's maternal line really brings it home by stretching back to the breed-influencing matron, Okutani. The maternal side of this pedigree pulls in the genetics of carcass trait leading sires Michifuku and 068, and includes the incredible Fujiko, who is a direct daughter of Okutani!

This is an exceptional pedigreed embryo lot that features both the sire and donor coming full circle from genetics originally exported from the US to Australia and then coming back to the US again! Itoshigenami TF148 blood dominates the genetics of these embryos. . The sire, L10, is a grandson of TF148. The dam, herself, is a daughter of the time-tested, highly proven, original import sire, TF 148 Itoshigenami. The dam, Lake Wagyu Y011, was the result of an embryo imported from Ken Dungey's Lake Wagyu herd in Australia. She shows an impressive sire stack of TF148 x Fukukane x Michifuku x TF Itomichi 1/2 and then the great imported cow, Yuriko. The Yuriko maternal line has produced breeding leading cattle in the US and Australia. This is an absolutely fantastic pedigree on which to build a breeding program. A resulting male or female from these embryos will have tremendous value!

Sanji is a great cross of Sanjirou, which is linebred Ysumi Doi, to a daughter of Kitateruyasudoj 003, one of the great marbling bulls of our time. Sanji's dam is a full sister to 005 Shigefuku 13M's dam. This is tremendous cow family. Sanji is well balanced, has great thickness and length, and has the thickest loin of any Sanjirou's sons. He is showing great marbling in his calves.

Kikokage 29A is a super mix of bloodlines: 32% Tajima, 26% Kedaka, 35% Shemane, 9% Okahama. She is very closely related to the original Japanese genetics. Her 6th dam, Yuriko-1 is one of the very few cows which exported from Japan to the USA. These embryos are a high reliability investment in fantastic genetics. Expect superior next generation results and propel your breeding program to the next level of performance!

CONSIGNED BY TALLY WINDHAM WAGYU RANCH, CLYDE, TX

SIRE, **SHIGEFUKU J1822**

Stored at Trans Ova, 11500 FM 974, Bryan, TX 77808, 712.722.3576.

bred from within the main Kedaka lines formed in the Tottori Prefecture and inherits strongly from Eiko. He is the only 100% Kedaka/Tottori sire available outside of Japan. In Japan, Wagyu breeders have shifted to a heavier emphasis on Kedaka lineage since around 2000, trying to focus on larger framed and more balanced growth sires of Kedaka lineage. 7 of the top 10 Wagyu sires in Japan during the 10- year 2005 to 2015 period have been of largely Kedaka heritage, and recently, the Kedaka cow has been valued above all others in Japan. For these reasons, Shigefuku has been growing in popularity outside Japan since approximately 2010.

Dai 20 Hirashige is an important sire of the Kedaka line. His semen is still used although the price per straw is higher than \$1000 each. He gained 84.7 points as an "Ikushu-Toroku" bull which was the highest honor in Japan at the time. The number of registered sons by this bull is very high.

005 Shigefuku was a bull that never left Japan, just his semen so the supply of semen is almost nonexistent.

Shigefuku J1822 does exhibit higher growth rates, body volume and desirable coat type.

Shigefuku weighed in at 1735 pounds at 23 months of age, an astonishing weight for any Wagyu bull at that age. We have no known reports of his full mature weight since he never left Japan but realistic estimates are 2400 pounds or more. This is the only known picture of this very rare bull to exist.

Dam in this embryo mating is WJB Ms Sanjirou 206F ET (FB36468) sired by JVP Kikuyasu -400 (FB2100) over CHR Sanjirou 390 (FB9955). Dam's pedigree includes World K's Suzutani, World K's Michifuku and Itomichi 1/2. Solid foundation stock and chance to add size and balanced growth to your herd. Dam and Sire are free of all recessive traits.

Embryos are stored at Bluestem Embryo Transfer Center, 735 900 Ave., Carlton, KS 67448, 785.949.2007.

For this mating we used BAR R Shigeshigetani 30T as the sire. Jerry Reeves of Bar R and Washington State University has represented 30T as one of the finest bulls his ranch has ever produced. 30T is unusual in that he is not at the top in one category but is a leader across the categories. Just what you want in a bull. We have seen him and he is one beautiful animal. 10E was developed as a growth animal with some good meat genetics as part of the package. Her sire, Hirashigetayasu, has become a very sought-after sire after demonstrating increasing size while delivering great marbling when crossed with a female with high marbling genetics. 10E is just such an animal. She has a clone of Itozuru Doi as the sire of her dam. The fact that he was cloned says volumes for what he represents as a sire. Try buying a straw of the original TF151. On the dam's side you have 068 (leader of marbling in the U.S. for years) x Kikuyasu 400. If you are a breeder wanting to increase size while maintaining great meat characteristics, she is the one. By crossing these two animals we feel this is a cannot miss combination. Genetic carrier free by testing.

DAM, **Z6C MS KITAGUNI JR 1 4 H11 ET**

Stored at Trans Ova, 11500 FM974, Bryan, TX 77808, 712.722.3576.
 The dam of this lot sired by no other than Kitaguni Jr. KITAGUNI JR's sire KITA-GUNI 7/8 won the "Wagyu Olympics" held every 5 years in Japan TWICE in a row! This is an amazing feat for a low Tajima, high Shimane bull with all the extra growth and maternal characteristics that come with it! Kitaguni Jr. did not inherit the large growth traits of his sire but he boasts an outstanding marble score of +1.9 with an 87% accuracy AND a marble fineness of +0.33 at an 86% accuracy. This bull marbles every time and will add marbling to any herd's maternal line or future herd bulls. The dam of this heifer is Z6C-Z039 Ms Itojiro, a large cow at 1,360 lbs and an amazing flush cow and registered in AuWA and AmWA with excellent genomic data for carcass size and huge loins.

The sire, TBR Shigeshigenami 3024Z is a powerful bull which pairs World K's Shigeshigetani, a direct son of World K's Haruki II and World K's Suzutani with influences from Monjiro, Tanshige, Kedaka, and Kumanami bloodlines through Suzunami with IWG Ms Itoshigenami 035X. 035X is a daughter of Itoshigenami by no other than the CF504 cow, sired by TF 148 Itoshigenami and by no other than Hikokura 1/10 tracing back to the Shimane Zenkyo Grand Champion cow Ezokintou J11691. It is well known that CF504 is an extremely powerful cow. She is a powerhouse dam and has the genomic EBVs to back her up.

Australian Wagyu Association EBVs place TBR 3024Z in the top 5% for eye muscle area (+5.6) and top 1% for marbling score (+2.4) while also possessing above average growth. As a result of this balanced EBV, 3024Z has obtained top 5% Wagyu Breeders Index (+\$250) and Self Replacing Index (+\$271) values while also obtaining top 1% Fullblood Terminal Index (+\$243) and F1 Terminal Index (+\$235) values.

Z6C Eikichisuzu E19 is royalty blood at its finest and a first and only offering of Eikichi blood in the United States. WKS Eikichi, has proven to be a phenomenal son by perhaps one of the all time greatest wagyu sires, Yasufuku J930. Eikichi's dam, Taguchi 9, was sired by Fukukane – a son of the great Tanifuku Doi and out of Kikuyasu 400's family. His second dam, Hanamichi 7 is sired by Hanazakura who is a son of Itohana from a Dai 7 Itozakura dam. Eikichi boasts one of the most powerful pedigrees and combines Yasufuku x Tanifuku Doi x Itohana - all of which are master BMS sires with tremendous ribeye area, superb meat quality, width in the shoulders, and marbling of the rump and sirloin.

The Dam, WSI Suzufuji, is sired by Kenhanafuji who produces superior females. Her dam is a full sister to two of the best Wagyu industry proven marbling sires, Sanjirou and Kanadagene 100. They are regarded as the premier sons of highly regarded Michifuku. Her dam is also 3/4 sister to Shigesigetani, a known super sire. Nothing but proven consistency from these bloodlines. The dam is tested free of all genetic disorders and free of IARS by pedigree.

The embryos are sired by the Rockstar sire, Genjiro and combines Haruki II with Kenhanafuji to ensure extremely stable female breedings. Combining Okutani bloodlines and Eikichi blood has produces some of the best marbling carcasses in the Wagyu industry.

Z6 Cattle Kanadatani 101 G2 is sired by no other than Kanadagene 101, perhaps the rarest of all – with Z6C Kanadatani 101 being the only known registered daughter in America and Australia. Kanadagene 101 is a powerful mating between Haruki II and Rikitani and is a close sibling to Longford Honjo, Tojo, and Zaki – all sires found in Australia with extremely high EBVs for marbling, marbling fineness, and large eye muscle area. The dam is free of IARS by pedigree.

The sire of these embryos, WKS Shigeshigetani is the son of WKS Haruki 2 and WKS Suzutani pairing the heritage of “TO P 100 WAGYU ” Monjiro , Kedaka influence through Kenshin by Kensei through Harumi, and Tanshige by Yasutani DOoi with Shigeshigenami of the Kumanami line and Tayasu Doi through granddaughter Suzuko. This potent combination of linebred Yasumi Doi line genetics paired with potent Kumanami blood while adding the outcross ability of Sakura 2 through the sire’s line resulted in not only phenotypic excellence but predictable carcass performance that recently pushed his BREEDPLAN EBVs to top 1% in marble score and eye muscle area lending credence to his historical reputation in the U.S. as THE premier sire.

In a stellar opportunity, these embryos combine a double Suzutani and Rikitani (triple Tanshige and triple Shigeshigenami) pairing in one superb package to create the best maternal lines available with improved milk, growth, muscling, and meat quality all while maintaining marbling consistency and all while linebreeding Monjiro through Haruki II with Michifuku and Kenhanafuji to further solidify maternal Rockstar status.

DAM, **Z6C MS SANJIROU Z077**

Stored at Trans Ova, 11500 FM974, Bryan, TX 77808, 712.722.3576.

Z6C-Z077 is a powerful cow with HIGH marbling, HUGE Loin, and LOTS of milk, combining Sanjirou/TF151/TF148. She is a recessive genetic disorder free daughter of Sanjirou and highly coveted grand daughter of TF 151 Itozurudo. Full sisters and 3/4 sisters of her have sold in excess of \$10,000, even at 8+ years of age! Her grand-dam is no other than the CF504 cow, sired by TF 148 Itoshigenami and by no other than Hikokura 1/10 tracing back to the Shimane dam Ezokintou. It is well known that CF504 is an extremely powerful cow. She is a powerhouse dam and has the genomic EBVs to back her up. From the latest data, Z077 boasts a marble score of +1.5, REA of +5.4 and marble fineness of +0.32!

Pairing Z6C-Z077 with Shigesigenami 3042Z, producing a marble score of +2.4 an REA of +5.9 and a carcass weight of +15, creates one of the strongest breedings available – double Suzutani through Sanjirou and Shigesigetani. This mating produces a top 5% ranking, huge ribeye of 5.7 and marble score of 2.0. On top of that, this breeding boasts excellence with the CF504 cow from the top and bottom of the pedigree.

Here is a chance to acquire rare and breed leading Westholme genetics. Westholme Hiramichi Tsuru hails from the renowned, high Kedaka, Hatsuhi maternal line. He is a Breedplan leader in growth traits, carcass weight, marbling, and Self Replacing Index among all proven sires. Semen from this bull has sold to over \$2,000 per straw. Westholme no longer sells any semen on this bull. He is widely regarded as one of the best proven sires in all of the Westholme program.

Itoguni 308H, sired by the infamous Mayura L0010, is the perfect amalgamation of US and Australian Genetics. His dam LMRFM6301 was bred by the Lone Mountain Cattle Company and is a blend of Itoshigenami 148, World K's Michifuku and World K's Kitaguni JR, all proven superior meat quality sires. Mayura L0010 has added weight to the mating whilst adding to the exceptional meat quality traits from the dams side. This super combination has resulted in Itoguni 308H, a tremendous bull that sees himself in the top 1% of the breed for BOTH Marble Score and Fineness and top 5% for Eye Muscle Area, making him a truly outstanding bull! His physical measured weights are exceeding his predicted values, so this really could be the bull of the future! He is enrolled in the Sire Progeny Testing Scheme run by the Australian Wagyu Association to fast track his Proven status. As a result of the program we expect to see his figures, which already highlight the quality of this bull, to improve further.

Semen is available immediately and is stored at Hawkeye Breeders Iowa, shipment is at the byers expense.

For US buyers, located at Elgin Services, 875 Central Ave, Elgin, TX 78621, 512.285.2019. For Canadian buyers, located at Alta Genetics, 1-263090 RR 11, Balzac, AB, T4B 2T3, 403.226.0666.

L0010 is a son of Mayura Itoshigenami Jnr 0139. Mayura L0010 ranks in the Top 1% for Marble Score EBV and Ribeye Area EBV and in the Top 1% for all 4 Wagyu Indexes. In 2017, he sold for \$105,000! L0010's dam, Mayura H0159, reflects Itozurudoi TF151 and Kanadagene 100 bloodlines from the Aizakura maternal line. Mayura L0010's sire, Mayura Itoshigenami Jnr, is referred to as "King of Australian Wagyu Sires". He has been at the top of the Australian Published Sire Reports since 2015 and now has 842 carcasses imaged and measured in Breedplan. In 2021, 2 straws of JNR sold to a World-record \$70,000 per straw; in 2019, one of his heifers sold for a record-setting \$280,000 and a son sold for \$185,000 in 2018; in 2021, another heifer of his sold for \$160,000. Mayura Itoshigenami Jnr is a progeny proven sire, a son of Itoshigenami TF148 – and his dam features the genetics of Sanjiro and Suzutani and TF Dai 2 Kinntou 3, an Itomichi daughter from the Hikokura maternal line. Mayura L0010 himself boasts incredible GEBVs of +2.6 MS, +7.6 REA, +43 CW, and \$334 SRI!! L0010 semen is no longer being sold, so the value here is priceless.

Lisheen N23 is a bull bred by Lisheen Wagyu in Australia to offer breeders an opportunity to infuse more traits into their herds than just marbling. N23 is a big, solid (980 Kg/2160 lb), gentle natured, well-bred bull. He is sired by Sumo Michifuku F126 and his Dam is sired by Terutani 40/1 with Haruki 2, TF Kikuhana and TF Aizakura 5/1 on her dam side. N23's Genomic enhanced EBV's place him in the Top 5% of the breed in Australia for all 4 Breeder indexes, 400 day weight, 600 day weight, MCW, and CW with Top 1% Milk EBV while still maintaining MS and MF figures well above breed average (Top 20%). He has calves on the ground at Lisheen which display superior growth, size, and structure. N23 is tested free of 4 recessive conditions – he is an F11 Carrier. Export qualified Semen has been collected at Total Livestock Genetics in Camperdown, Victoria, Australia under the EU/USA/Canada/CSS/NZ/Australia protocol (eligible for most countries except China). Semen is available from storage at TLG in Australia and also direct from storage in the USA and UK via AgriGene (Wangaratta, Victoria, Australia) – N23 is also registered in Australia, USA and Germany. If you would like to get size, growth, fertility and maternal traits into your herd without sacrificing MS and ME, this bull should be seriously considered.

This is a limited release of Ranger Q434G, the current high-selling fullblood bull in the world recently purchased for \$150k. He currently sits in the top 1% of Breed-plan for Eye Muscle Area, Marble Score and Marble Fineness. In Addition, he reaches the top 1% for Self Replacing Index, Fullblood Terminal Index and F1 Terminal index and is well into the upper 5% for Wagyu Breeder Index. He is currently involved in a true progeny test that involves 800 cows testing over 50 bulls. He is the first L0010 son in the US to be enrolled in such a test, and all the data collected from that test will be made public.

Semen is not exportable and is stored at Elgin Breeding Service

Enjoy world renowned hunting adventure for two at the DuckWild Impoundment in picturesque Hyde County North Carolina. Your trip will include a Friday evening of food and fellowship with plenty of bird watching in between, lodging, a Saturday duck hunt, and a meal after the hunt. Awake Saturday morning to join our group of sportsmen as we make our way to the impoundment and hunt multiple species of waterfowl such as Mallards, Pintail, Green Wing Teal, Bluebill, and many more. We will provide all the necessities for your hunt, just bring some warm clothes and be prepared to have a great time! Trip will include transportation from the Greenville North Carolina airport on Friday, November 19th and transportation back to Greenville North Carolina on Saturday, November 20th in the afternoon. Please come and join us for a memorable hunt!

North Carolina Hunting Licence and Federal Duck Stamp will need to be purchased by the highest bidder.

VIP TRIP FOR TWO TO SEATTLE, WA

Value: \$6,000

Two-Night Stay At The Beecher's Loft

Perched above Beecher's Handmade Cheese in the famous Pike Place Market, Beecher's Loft's floor-to-ceiling windows offer a bird's eye view of Seattle's celebrated Market, sparkling Puget Sound and the stunning Olympic Mountains beyond. With a western exposure, the sophisticated interiors harmoniously blend the exposed beams and iron rusted counters with warm wood floors, custom furnishings and hand-tufted rugs.

Cheesemaker For A Day with Beecher's Handmade Cheese

From the heart of Seattle's historic Pike Place Market, get behind-the-scenes with award-winning Beecher's Handmade Cheese, learning the techniques employed by cheesemakers for thousands of years. You'll also be able to enjoy the delicious results, from the super-fresh, squeaky cheese curds to our aged, award-winning versions. This is a once-in-a-lifetime day of deliciousness!

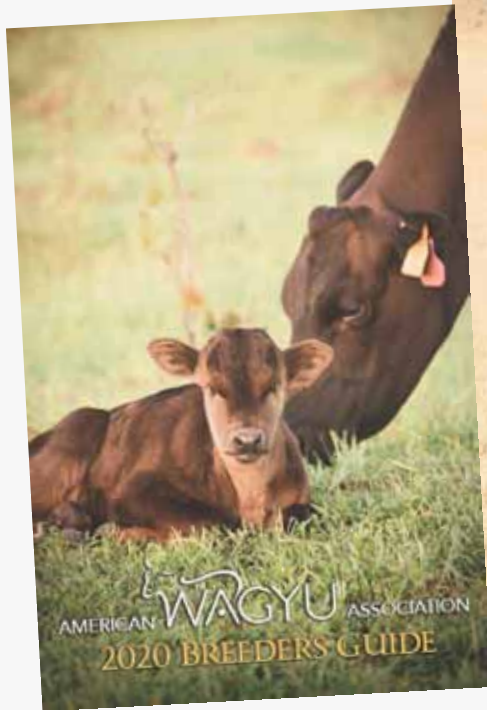

Dinner For Two At The Butcher's Table

"Superior dining destination" ... Wine Spectator
Top ranked steakhouse in the U.S. ... Far & Wide

You and your guest are invited to a distinctive, luxurious dinner specially prepared at The Butcher's Table. Featuring Mishima Reserve American Wagyu Beef, The Butcher's Table is a modern steakhouse serving up an unparalleled culinary experience.
